

Take control of soil health on your farm

- Investigate how you can reduce input costs
- Find new ways to increase soil productivity
- Understand the benefits of soil organic carbon

Apply now for our new soil carbon programme.

Eligible participants may qualify for free soil test and agronomic advice!

**NORTH EAST
CATCHMENT
MANAGEMENT
AUTHORITY**

**CARING
FOR
OUR
COUNTRY**

Do you know what soil carbon is? Do you know what your soils are capable of storing?

Join our new programme and build your understanding about soil carbon and its role in building soil health and productivity improvements.

KEY PROGRAMME FEATURES

This four year, catchment wide project offers you a range of benefits:

- **Free soil tests and agronomic advice available** (eligibility criteria apply)
- **Detailed soil test on your farm*** - including: N, P, S, Ex Cations, pH, Chloride, EC, Organic Carbon, Color, Texture, Trace Elements
- **Free mapping training available** to all participants
- **Learn through forums** – meet with other farmers to discuss and learn about soil carbon, carbon sequestration and soil health
- **Field days** – attend free field days in various locations across the north east

*limited number of soil tests to be conducted across the region – register now to secure your place

FREE AGRONOMIC ADVICE:

- Improve your soil carbon and identify the carbon sequestration capabilities of your soil
- Improve your soil moisture & nutrient holding capacity
- Map, monitor and control your soil health, obtain baseline data with highly detailed soil testing and advice
- Potentially increase productivity and lower your inputs and costs

This project is supported by the North East Catchment Management Authority through funding from the Australian Government's Caring for our Country programme.
